Adobe Creative Suite  
(Photoshop, Illustrator, InDesign,  
After Effects), Rhino 3D,  
Microsoft Office, SketchUp,  
Notion, Ableton Live

2019 — 2021, Berlin

## Tech Support Infosys

Here I was part of the English speaking IT support team who provided technical assistance to internal staff and workers at Innogy. This included troubleshooting technical issues, fixing user accounts, installing and updating specialist software, and providing remote support for hardware problems.

2021 — ongoing, Berlin

## Music Event Organisation Slightly Off / Mouthfull Radio

During the 2020-21 winter lock-down I became involved with organising and running a weekly radio show. My aims and responsibilities are to bring people together to create communities around a shared love of music and culture. During the summer of 2021 I organised and coordinated several outdoor events in Neukölln and Charlottenburg with the aim of extending this music community from virtual to physical space. This required excellent communication, design, marketing, and technical skills that I have learnt from previous jobs.

2019, Christchurch

## Spatial Designer Patch

I was invited to join the small team at Patch and take part in a ‘start-up accelerator program’ funded by the New Zealand Government. The aims of the project were to design a feasible, business-ready solution to help make free-camping more sustainable and environmentally friendly. As the sole designer my responsibilities included carrying out research, conducting interviews, prototyping, development/detail design, and creating presentations for stakeholders and potential investors.

2018 (Summer Job), Kaikoura

## Field Assistant Geotech

As an assistant at Geotech I was involved in several repair and structural strengthening projects following the devastating 2016 Kaikoura earthquakes in New Zealand. My responsibilities involved carrying out surveying work in the mountains and along the coastline, collecting measurements and preparing sites for upcoming construction and engineering work.

2017 (Part Time), Wellington

## Student Internship Mevo

As a student intern at Mevo I was responsible for a diverse range of tasks including assisting with administration work, processing payments from customers, and responding to questions from various stakeholders. I also provided assistance with operations and logistics by helping to manage the fleet of electric vehicles in the evenings—ensuring that they were maintained and in their correct locations for use by customers the following day.
